Students Sustainability Clubs

Greenhouse Learning Community

The Greenhouse Learning Community at the University of Technology is for students passionate about the relationship between people and nature. Members explore ways to use fewer natural resources and learn how to become agents of change for a more sustainable society.

Iraqi Culture and Heritage Innovation Club

This club provides insights into Iraq's rich cultural heritage, exploring its history and promoting innovation in preserving and celebrating cultural traditions.

Beginning Farmers Network

The network focuses on urban agriculture initiatives, growing food on campus and offering students and community members opportunities to learn about sustainable farming practices.

Environmental Education Club

Open to all students with a passion for the environment, this club educates members about environmental issues, inspires them to address topics they care about, and serves the community through local environmental service projects.

Go Green Club

Dedicated to raising awareness about environmental conservation and protection, the Go Green Club organizes green events to inspire sustainable practices within the university community and beyond.

Sustainable Food Club

This club aims to educate students about sustainable food practices and promote sustainable living through workshops, activities, and awareness campaigns.

Sustainability Network Club

The Sustainability Network Club focuses on professional development, education, and community engagement related to the three pillars of sustainability: the environment, the economy, and social equity.

***These clubs at the University of Technology empower students to become leaders in sustainability and create a positive impact on their campus and communities**
